Introduction

The Census of Fatal Occupational Injuries (CFOI) program is a Federal/State cooperative program, created in 1990 by the U.S. Department of Labor, Bureau of Labor Statistics. All 50 states and the District of Columbia participate in the program. The CFOI program was established to determine a true count of work-related fatal injuries in the United States. Prior to CFOI, estimates of work-related fatalities varied because of differing definitions and reporting sources. The CFOI program collects and compiles workplace fatality data based on guidelines established by the U.S. Bureau of Labor Statistics which are consistent for all states.

The CFOI program provides data on all fatal workplace injuries in all industries and for all ages. To be included in CFOI, a fatality must be the result of an incident that occurs while the employee is in work status.

For questions regarding the data in this publication please contact:

Scope of Fatality Data

All deaths due to work-related injuries in 2006 are included in the Census of Fatal Occupational Injuries (CFOI). A case is considered work-related if an event or exposure resulted in a fatality while an employee is in work status, whether at an on-site or off-site location.

Fatalities must be confirmed by two independent sources before inclusion in CFOI. Sources include death certificates, first reports of injury for workers' compensation, medical examiner's reports, Department of Marine Resources reports, Maine State Police reports, Bureau of Motor Vehicles fatality records, Coast Guard reports, OSHA reports, and news media.

Fatal occupational illnesses are excluded from this report since many fatalities due to an illness or disease may not be diagnosed until years later or the work relationship may not be known.

Heart attacks and strokes are generally considered illnesses and are excluded from the count.

However, heart attacks and strokes are considered an injury if a traumatic work injury or event was listed as a contributing or underlying cause of death on the death certificate or other medical report.

Fatal injuries that occurred in international waters or airspace surrounding the U.S. are in-scope if a U.S. death certificate was issued and the case meets the CFOI criteria for work relationship. Injuries that occurred in another country are out-of-scope even if a U.S. death certificate was issued. For example, a death in the U.S. that occurred from an injury sustained in Canada would be considered out-of-scope. A state will be responsible for compiling data for an out of state death, if the incident occurred in its own state. Also an injury that occurred in 1996 for example that resulted in a death in 2005 will be counted in the year 2005.

Each fatality is coded according to the Bureau of Labor Statistics Occupational Injury and Illness Classification System. Each fatality is classified in seven categories: **Nature**, **Part**, **Source**, **Secondary Source** (if applicable), **Event** or **Exposure**, **Activity**, and **Location** of the incident.

Worker Characteristics

Worker Characteristics

Table 1 lists the general characteristics of the 20 workers who were fatally injured in Maine in 2006. The list includes the ownership, employment status, gender and race.

Table 1. Fatal Occupational Injuries by Characteristic, Maine, 2006

<u>Characteristic</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Ownership		
Private Industry	18	90.0
Other Industry	2	10.0
Employment Status		
Working for Wage or Salary	12	60.0
Self-Employed	7	35.0
Other	1	5.0
Gender		
Male	18	90.0
Female	2	10.0
Race		
White	20	100.0

Industry

Table 2 lists the number and percent distribution of fatal workplace injuries by the industry in which the worker was working when the incident occurred (See Figure 1).

Table 2. Fatal Occupational Injuries by Industry, Maine, 2006

<u>Industry</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Agriculture, Forestry, and Fishing	4	20.0
Manufacturing	4	20.0
Transportation	3	15.0
Services	3	15.0
Other	6	30.0

Figure 1. Fatal Occupational Injuries by Industry, Maine, 2006

Occupation

Table 3 lists the number and percent distribution of fatal workplace injuries by the worker's occupation when the incident occurred (See Figure 2).

Table 3. Fatal Occupational Injuries by Occupation, Maine, 2006

<u>Occupation</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Farming, Forestry, and Fishing	6	30.0
Managerial and Professional Specialty	5	25.0
Precision Production, Craft, and Repair	4	20.0
Transportation	3	15.0
Other	2	10.0

Figure 2. Fatal Occupational Injuries by Occupation, Maine, 2006

Incident Characteristics

Nature

The Nature identifies the initial injury which led to the fatality. If an injury led to further complications, the initial injury is coded as the nature (e.g., for a cut leading to infection, the cut is the nature of the injury even though the death was from infection). Table 4 lists the number and percent distribution of the fatal injuries by the Nature of injury that resulted in the fatality.

Table 4. Fatal Occupational Injuries by Nature, Maine, 2006

<u>Nature</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Multiple Intracranial Injuries	6	30.0
Drowning	4	20.0
Internal Injuries to Organs & Blood Vessels of the Trunk	3	15.0
Multiple Traumatic Injuries & Disorders	3	15.0
Other	4	20.0

Figure 3. Fatal Occupational Injuries by Nature, Maine, 2006

Part of Body

The Part of Body identifies the injured person's body part directly affected by the injury. Table 5 lists the number and percent distribution of the fatal injuries by the body part directly affected by the injury which led to the fatality.

Table 5. Fatal Occupational Injuries by Part of Body, Maine, 2006

<u>Part of Body</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Head	7	35.0
Body Systems	6	30.0
Multiple Body Parts	4	20.0
Trunk	3	15.0

Figure 4. Fatal Occupational Injuries by Part of Body, Maine, 2006

Source

The Source of the injury identifies the object, substance, exposure, or bodily motion which directly produced the injury. Table 6 lists the number and percent distribution of the fatal injuries by the Source of the injury which led to the fatality.

Table 6. Fatal Occupational Injuries by Source, Maine, 2006

<u>Source</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Vehicles	11	55.0
Highway Vehicles	6	30.0
Highway Trucks	3	15.0
Other	2	10.0
Machinery	4	20.0
Other Sources	5	25.0

Figure 5. Fatal Occupational Injuries by Source, Maine, 2006

Event/Exposure

The Event/Exposure identifies the actual event which directly led to the fatality. Table 7 lists the number and percent distribution of the fatal injuries by the Event/Exposure.

Table 7. Fatal Occupational Injuries by Event/Exposure, Maine, 2006

<u>Event/Exposure</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Transportation Accidents	12	60.0
Contact with Objects & Equipment	3	15.0
Other	5	25.0

Secondary Source

The Secondary Source identifies the object, substance, or person that generated the source of the injury or contributed to the event or exposure. Table 8 lists the number and percent distribution of the fatal injuries by the Secondary Source.

Table 8. Fatal Occupational Injuries by Secondary Source, Maine, 2006

<u>Secondary Source</u>	<u>Number</u>	<u>Percent</u>
<u>Total</u>	7	100.0
Structures & Surfaces	3	42.9
Other Sources	4	57.1

A fatal event may or may not involve a secondary source. In 2006, 7 fatal events involved a secondary source.

Work Activity

The Work Activity describes what the worker was doing at the time of an incident. Table 9 lists the number and percent distribution of the fatal injuries by the Work Activity.

Table 9. Fatal Occupational Injuries by Work Activity, Maine, 2006

<u>Work Activity</u>	<u>Total</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Vehicle and Transportation Operations	12	60.0
Constructing, Repairing, Cleaning	4	20.0
Unknown Activities	1	5.0
Other	3	15.0

Work Location

The Work Location describes where the employee was working at the time of an incident. Table 10 lists the number and percent distribution of the fatal injuries by the Work Location.

Table 10. Fatal Occupational Injuries by Work Location, Maine, 2006

<u>Location</u>	<u>Total</u>	<u>Percent</u>
<u>Total</u>	20	100.0
Street or Highway	6	30.0
Other Places	6	30.0
Industrial Place & Premises	4	20.0
Other Locations	4	20.0
